---

Effective immediately, the following is added to “Market Risk” in the section titled “Additional Principal Risk Information” in each Fund’s Prospectus:

Russia’s military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict could increase volatility and uncertainty in the financial markets and adversely affect regional and global economies. The United States and other countries have imposed broad-ranging economic sanctions on Russia, certain Russian individuals, banking entities and corporations, and Belarus as a response to Russia’s invasion of Ukraine, and may impose sanctions on other countries that provide military or economic support to Russia. The extent and duration of Russia’s military actions and the repercussions of such actions (including any retaliatory actions or countermeasures that may be taken by those subject to sanctions, including cyber attacks) are impossible to predict, but could result in significant market disruptions, including in certain industries or sectors, such as the oil and natural gas markets, and may negatively affect global supply chains, inflation and global growth. These and any related events could significantly impact the Fund’s performance and the value of an investment in the Fund, even if the Fund does not have direct exposure to Russian issuers or issuers in other countries affected by the invasion.

---

Also effective immediately, the following is added to the section titled “Recent Market Circumstances” in each Fund’s SAI (unless already included):

Russia’s military invasion of Ukraine in February 2022 resulted in the United States, other countries, and certain international organizations levying broad economic sanctions against Russia. These sanctions froze certain Russian assets and prohibited, among other things, trading in certain Russian securities and doing business with specific Russian corporate entities, large financial institutions, officials and oligarchs. The sanctions also included the removal of some Russian banks from the Society for Worldwide Interbank Financial Telecommunications (SWIFT), the electronic network that connects banks globally, and imposed restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions. The United States and other countries have also imposed economic sanctions on Belarus and may impose sanctions on other countries that support Russia’s military invasion. A number of large corporations and U.S. states have also announced plans to divest interests or otherwise curtail business dealings with certain Russian businesses. These sanctions and any additional sanctions or other intergovernmental actions that may be undertaken against Russia or other countries that support Russia’s military invasion in the future may result in the devaluation of Russian or other affected currencies, a downgrade in the sanctioned country’s credit rating, and a decline in the value and liquidity of Russian securities and securities of issuers in other countries that support the invasion. The potential for wider conflict may further decrease the value and liquidity of certain Russian securities and securities of issuers in other countries affected by the invasion. In addition, the ability to price, buy, sell, receive, or deliver such securities is also affected due to these measures. For example, a fund may be prohibited from investing in securities issued by companies subject to such sanctions. In addition, the sanctions may require a fund to freeze its existing investments in companies operating in or having dealings with Russia or other sanctioned countries, which would prevent a fund from selling these investments. Any exposure that a fund may have to Russian counterparties or counterparties in other sanctioned countries also could negatively impact the fund’s portfolio.

The extent and duration of Russia’s military actions and the repercussions of such actions, including any retaliatory actions or countermeasures that may be taken by Russia or others subject to sanctions (such as cyberattacks on other governments, corporations or individuals) are unpredictable, but could result in significant market disruptions, including in the oil and natural gas markets, and may negatively affect global supply chains, inflation and global growth. These and any related events could significantly impact the Fund’s performance and the value of an investment in the Fund, even beyond any direct exposure the Fund may have to Russian issuers or issuers in other countries affected by the invasion.

## Fund Summary

### Investment Objective

The India Internet & Ecommerce ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of INQQ The India Internet & Ecommerce Index™ (the “Index”).

### Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fee	0.86%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses <sup>1</sup>	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.86%</b>

<sup>1</sup> Based on estimated amounts for the current fiscal year.

### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

<b>1 Year</b>	<b>3 Years</b>
\$88	\$274

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares of the Fund are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example above, affect the Fund’s performance. Because the Fund is new, portfolio turnover information is not yet available.

## Principal Investment Strategies

The Fund invests in securities comprising the Index or in depositary receipts representing securities of the Index. The Index was designed by Big Tree Capital LLC (the “Index Provider”) to measure the performance of an investable universe of publicly-traded, Indian internet and ecommerce companies. Companies eligible for inclusion in the Index derive a majority of their assets or revenues from internet and ecommerce activities in India (collectively, “Internet Companies”). Internet Companies include, but are not limited to, companies in the following sectors, as defined by the Index Provider: Internet Services, Internet Retail, Internet Broadcasting, Internet Media, Online Advertising, Online Travel, Online Gaming, Search Engines, and Social Networks. Products and services of Internet Companies may include internet, mobile, and telecommunication value-added services, online advertising, online direct sales, internet security software and services, mobile applications, e-mail service, web portals, electronic media subscription services, online entertainment, and online gaming services. Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the securities of Internet Companies.

Eligible Index constituents include publicly issued common equity securities, exchange-traded American Depositary Receipts (ADRs), American Depositary Shares (ADSs), Global Depositary Receipts (GDRs), and International Depositary Receipts (IDRs) of Internet Companies that have a free-float adjusted market capitalization of at least \$300 million at the time of inclusion in the Index. A free-float adjusted market capitalization of at least \$200 million is required for ongoing inclusion in the Index. Index constituents are weighted by their modified float-adjusted market capitalization in accordance with the index methodology developed by the Index Provider. “Float-adjusted” means that the share amounts used in calculating the Index reflect only shares available to investors. Eligible constituents must have a three-month average daily turnover of at least \$1 million. Companies with restrictions on foreign ownership may be excluded from the Index.

The Index is reconstituted and rebalanced on a semi-annual basis in June and December. The target weight of any single position is limited to 8% of the Index. At each rebalance, any security with an Index weighting of greater than 8% will be rebalanced back to 8% and the excess weighting will be applied proportionally to all remaining Index constituents. Then, all positions whose float-adjusted market capitalization weights are over 5% are added together. If the total weight is less than 50%, no further modifications are made. If the total weight is equal to or greater than 50% then the highest weighted position is capped at 8%. The excess weight is then applied on a pro-rata basis to all the remaining index constituents and the process is then repeated, if necessary, with the next largest stock being capped at a weight 0.5% less than the previous constituent (*i.e.*, 7.5%, 7%, 6.5%, 6%, 5.5%, 5%, 4.5%) until the total combined weight of index constituents over 5% is less than 50%. The 4.5% maximum target weight is then applied to all the remaining stocks. Due to market actions, security weights may fluctuate above the targeted caps set forth above between rebalances. As of March 11, 2022, the Index comprised 21 securities.

The Index is maintained by Solactive AG (the “Index Administrator”). The Index Administrator is responsible for implementing the semi-annual rebalance and reconstitution, monitoring and implementing any adjustments, additions and deletions to the Index based upon the Index methodology or certain corporate actions, such as initial public offerings, mergers, acquisitions, bankruptcies, suspensions, de-listings, tender offers and spin-offs. The Index is unmanaged and cannot be invested in directly.

The Fund employs a “passive management” investment strategy in seeking to achieve its investment objective. The Fund generally will use a replication methodology, meaning it will invest in all of the securities comprising the Index in proportion to the weightings in the Index. However, the Fund may utilize a sampling methodology under various circumstances, including when it may not be possible or practicable to purchase all of the securities in the Index. Exchange Traded Concepts, LLC (the “Adviser”) expects that over time, if the Fund has sufficient assets, the correlation between the Fund’s performance, before fees and expenses, and that of the Index will be 95% or better. A figure of 100% would indicate perfect correlation.

The Fund may invest up to 20% of its assets in investments that are not included in the Index, but which the Adviser believes will help the Fund track the Index. Such investments include cash and cash equivalents, other investment companies and other securities not included in the Index.

The Fund will concentrate its investments (*i.e.*, invest more than 25% of its total assets) in a particular industry or group of industries to approximately the same extent that the Index concentrates in an industry or group of industries. As of March 11, 2022, the Index was not concentrated in any industry. In addition, in replicating the Index, the Fund may from time to time invest a significant portion of its assets in the securities of companies in one or more sectors. As of March 11, 2022, a significant portion of the Index consisted of companies in the Information Technology Sector.

The Fund is non-diversified under the Investment Company Act of 1940 (the “1940 Act”) and, therefore, may invest a greater percentage of its assets in a particular issuer than a diversified fund.

The Index Provider is not affiliated with the Fund or the Adviser. The Index Provider developed the methodology for determining the securities to be included in the Index and for the ongoing maintenance of the Index. The Index is calculated by the Index Administrator, which is not affiliated with the Fund, the Adviser, or the Index Provider.

### **Principal Risks**

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. The principal risks affecting shareholders’ investments in the Fund are set forth below.

*Cash Transactions Risk.* The Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. As a result, the Fund may have to sell portfolio securities at inopportune times in order to obtain the cash needed to meet redemption orders. This may cause the Fund to sell a security and recognize a capital gain or loss that might not have been incurred if it had made a redemption in-kind. The use of cash creations and redemptions may also cause the Fund’s shares to trade in the market at wider bid-ask spreads or greater premiums or discounts to the Fund’s NAV. In effecting creations and redemptions in exchange for cash, the Fund may incur certain costs, including brokerage costs in connection with investing cash received and may recognize capital gains in connection with cash redemptions, unlike an ETF that effects creations and redemptions only in-kind. In addition, costs could be imposed on the Fund which would have the effect of decreasing the Fund’s net asset value (“NAV”) to the extent the costs are not offset by a transaction fee payable by an Authorized Participant.

*Common Stock Risk.* Common stock holds the lowest priority in the capital structure of a company and, therefore, takes the largest share of the company’s risk and its accompanying volatility. The value of the common stock held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or facts relating to specific companies in which the Fund invests.

*Currency Exchange Rate Risk.* To the extent the Fund invests in securities denominated in non-U.S. currencies, changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your shares. Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if the currency of the non-U.S. market in which the Fund invests depreciates against the U.S. dollar, even if the value of the Fund's holdings, measured in the foreign currency, increases. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

*Depository Receipt Risk.* ADRs, ADSs, GDRs and IDRs are subject to the risks associated with investing directly in foreign securities. In addition, investments in ADRs, ADSs, GDRs and IDRs may be less liquid than the underlying shares in their primary trading market.

*Early Close/Trading Halt Risk.* An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments, and/or may incur substantial trading losses.

*Emerging Markets Securities Risk.* Emerging markets are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets and more governmental limitations on foreign investment than more developed markets. In addition, securities in emerging markets may be subject to greater price fluctuations than securities in more developed markets. Differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards could impede the Adviser's ability to evaluate local companies and impact the Fund's performance. Investments in securities of issuers in emerging markets may also be exposed to risks related to a lack of liquidity, greater potential for market manipulation, issuers' limited reliable access to capital, and foreign investment structures. Additionally, the Fund may have limited rights and remedies available to it to pursue claims against issuers in emerging markets.

*Equity Securities Risk.* The prices of equity securities in which the Fund invests may rise and fall daily. These price movements may result from factors affecting individual issuers, industries or the stock market as a whole.

*Foreign Securities Risk.* Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments. Foreign securities may have relatively low market liquidity and decreased publicly available information about issuers. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, where all or a portion of the Fund's portfolio holdings trade in markets that are closed when the Fund's market is open, there may be valuation differences that could lead to differences between the Fund's market price and the value of the Fund's portfolio holdings.

*Indian Securities Risk.* Investment in Indian securities involves risks in addition to those associated with investments in securities of issuers in more developed countries, which may adversely affect the value of the Fund’s assets. Such heightened risks include, among others, political and legal uncertainty, greater government control over the economy, currency fluctuations or blockage and the risk of nationalization or expropriation of assets. The securities market of India is considered an emerging market that is characterized by a small number of listed companies that have significantly smaller market capitalizations, greater price volatility and substantially less liquidity than companies in more developed markets. These factors, coupled with restrictions on foreign investment and other factors, limit the supply of securities available for investment. This will affect the rate at which the Fund is able to invest in securities of Indian companies, the purchase and sale prices for such securities, and the timing of purchases and sales. Certain restrictions on foreign investment may decrease the liquidity of the Fund’s portfolio, subject the Fund to higher transaction costs, or inhibit the Fund’s ability to track the Index. The Fund’s investments in securities of issuers located or operating in India, as well as its ability to track the Index, also may be limited or prevented, at times, due to the limits on foreign ownership imposed by the Reserve Bank of India (“RBI”).

The Fund is registered as a foreign portfolio investor (“FPI”) with the Securities and Exchange Board of India (“SEBI”) in order to have the ability to make and dispose of investments in Indian securities. There can be no assurance that the Fund will qualify or continue to qualify as an FPI under the SEBI FPI Regulations, 2019, or that the Indian regulatory authorities will continue to grant such qualifications, and the loss of such qualifications could adversely impact the ability of the Fund to make and dispose of investments in India. Investments by FPIs in Indian securities are also subject to certain limits and restrictions under applicable law, and the application of such limits and restrictions could adversely impact the ability of the Fund to make investments in India.

Because the Fund invests primarily in the securities of companies in India, it will be impacted by events or conditions affecting India. Political and economic conditions and changes in regulatory, tax, or economic policy in India could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund’s performance. There may be less reliable or publicly-available information about the Indian market due to non-uniform regulatory, accounting, auditing or financial recordkeeping standards, which could cause errors in the implementation of the Fund’s investment strategy and in index data, computation, and construction. For these reasons, the Index Provider’s due diligence and oversight process with respect to index data, computation, construction and rebalancing may be limited, all of which may have an adverse impact on the Fund. The Fund’s performance may depend on issues other than those that affect U.S. companies and may be adversely affected by different rights and remedies associated with emerging market investments, or the lack thereof, compared to those associated with U.S. companies. The Indian economy may differ favorably or unfavorably from the U.S. economy in such respects as the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

The Indian government has exercised and continues to exercise significant influence over many aspects of the economy, and the number of public sector enterprises in India is substantial. Accordingly, Indian government actions in the future could have a significant effect on the Indian economy. Despite recent downturns, the Indian economy has experienced generally sustained growth during the last several years. There are no guarantees this will continue. While the Indian government has implemented economic structural reforms with the objective of liberalizing India's exchange and trade policies, reducing the fiscal deficit, controlling inflation, promoting a sound monetary policy, reforming the financial sector, and placing greater reliance on market mechanisms to direct economic activity, there can be no assurance that these policies will continue or that the economic recovery will be sustained. Religious and border disputes persist in India. In addition, India has experienced civil unrest and hostilities with neighboring countries such as Pakistan. The Indian government has confronted separatist movements in several Indian states. Investment and repatriation restrictions and tax laws in India may impact the ability of the Fund to track its Index. Each of the factors described above could have a negative impact on the Fund's performance and increase the volatility of the Fund.

*Illiquid Investments Risk.* This risk exists when particular Fund investments are difficult to purchase or sell, which can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

*Index Tracking Risk.* The Fund's return may not match or achieve a high degree of correlation with the return of the Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index.

*Industry Concentration Risk.* Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. As of March 11, 2022, the Index was not concentrated in any industry.

*Internet Companies Risk.* The Fund invests in the securities of Internet Companies, including internet services companies and internet retailers. Internet Companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, cyclical market patterns, evolving industry standards, frequent new product introductions and the considerable risk of owning small capitalization companies that have recently begun operations.

*Issuer-Specific Risk.* Fund performance depends on the performance of individual securities to which the Fund has exposure. Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

*Large-Capitalization Risk.* Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies. The securities of large-capitalization companies may also be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

*Limited Authorized Participants, Market Makers and Liquidity Providers Risk.* Because the Fund is an exchange-traded fund (“ETF”), only a limited number of institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occurs, the risk of which is higher during periods of market stress, shares of the Fund may trade at a material discount to NAV and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

*Market Risk.* The market price of a security or instrument could decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the market generally and on specific securities. The market value of a security may also decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

*New/Smaller Fund Risk.* A new or smaller fund is subject to the risk that its performance may not represent how the fund is expected to or may perform in the long term. In addition, new funds have limited operating histories for investors to evaluate and new and smaller funds may not attract sufficient assets to achieve investment and trading efficiencies. There can be no assurance that the Fund will achieve an economically viable size, in which case it could ultimately liquidate. The Fund may be liquidated by the Board of Trustees (the “Board”) without a shareholder vote. In a liquidation, shareholders of the Fund will receive an amount equal to the Fund’s NAV, after deducting the costs of liquidation, including the transaction costs of disposing of the Fund’s portfolio investments. Receipt of a liquidation distribution may have negative tax consequences for shareholders. Additionally, during the Fund’s liquidation all or a portion of the Fund’s portfolio may be invested in a manner not consistent with its investment objective and investment policies.

*Non-Diversification Risk.* The Fund is a non-diversified investment company under the 1940 Act, meaning that, as compared to a diversified fund, it can invest a greater percentage of its assets in securities issued by or representing a small number of issuers. As a result, the performance of these issuers can have a substantial impact on the Fund’s performance.

*Operational Risk.* The Fund and its service providers may experience disruptions that arise from human error, processing and communications errors, counterparty or third-party errors, technology or systems failures, any of which may have an adverse impact on the Fund.

*Passive Investment Risk.* The Fund is not actively managed and, therefore, the Fund would not sell a security due to current or projected underperformance of the security, industry or sector, unless that security is removed from the Index or selling the security is otherwise required upon a rebalancing of the Index.

*Sector Focus Risk.* The Fund may invest a significant portion of its assets in one or more sectors and thus will be more susceptible to the risks affecting those sectors. While the Fund's sector exposure is expected to vary over time based on the composition of the Index, the Fund anticipates that it may be subject to some or all of the risks described below. The list below is not a comprehensive list of the sectors to which the Fund may have exposure over time and should not be relied on as such.

*Information Technology Sector Risk.* The Fund is subject to the risk that market or economic factors impacting technology companies and companies that rely heavily on technology advances could have a major effect on the value of the Fund's investments. The value of stocks of technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, the loss of patent, copyright and trademark protections, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Information technology companies may also be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. Information technology company stocks, especially those which are Internet related, have experienced extreme price and volume fluctuations that are often unrelated to their operating performance.

*Small- and Mid-Capitalization Risk.* The small- and mid-capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. Securities of small- and mid-capitalization companies generally trade in lower volumes, are often more vulnerable to market volatility, and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole.

*Trading Risk.* Shares of the Fund may trade on the NYSE Arca, Inc. (the "Exchange") above (premium) or below (discount) their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund's holdings. The market prices of the Fund's shares will fluctuate continuously throughout trading hours based on market supply and demand and may deviate significantly from the value of the Fund's holdings, particularly in times of market stress, with the result that investors may pay more or receive less than the underlying value of the Fund shares bought or sold. When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask), which is known as the bid-ask spread. In addition, although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable. In stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. In such a circumstance, the Fund's shares could trade at a premium or discount to their NAV.

## **Performance Information**

The Fund is new and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by comparing the Fund's return to a broad measure of market performance.

## **Investment Adviser**

Exchange Traded Concepts, LLC serves as the investment adviser to the Fund.

## **Portfolio Managers**

Andrew Serowik, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2022.

Todd Alberico, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2022.

Gabriel Tan, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2022.

## **Purchase and Sale of Fund Shares**

The Fund issues (or redeems) shares to certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of shares known as "Creation Units." Creation Unit transactions for the Fund are generally conducted in exchange for cash. Individual shares of the Fund may only be purchased and sold in the secondary market through a broker or dealer at a market price. The Fund's shares are listed on the Exchange. You can purchase and sell individual shares of the Fund throughout the trading day like any publicly traded security. The price of the Fund's shares is based on a market price, and, because exchange-traded fund shares trade at market prices rather than NAV, shares may trade at prices greater than NAV (premium) or less than NAV (discount). When buying or selling shares of the Fund in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the "bid-ask spread"). When available, recent information regarding the Fund's NAV, market price, premiums and discounts, and bid-ask spreads will be available at [www.inqqetf.com](http://www.inqqetf.com).

## **Tax Information**

Distributions made by the Fund may be taxable as ordinary income, qualified dividend income, or long-term capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account. In that case, you may be taxed when you take a distribution from such account, depending on the type of account, the circumstances of your distribution, and other factors.

## **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## **Index Information/Trademark License/Disclaimer**

The Index Provider is Big Tree Capital LLC. The Index Provider is not affiliated with Exchange Traded Concepts Trust (the "Trust"), the Adviser, the Index Administrator, the Fund's administrator, custodian, transfer agent or distributor, or any of their respective affiliates. The Adviser has entered into an arrangement with the Index Provider pursuant to which the Adviser pays a fee to use the Index and, in connection with that arrangement, the Index Provider has agreed to assume the Adviser's obligation to pay Fund expenses and, to the extent applicable, has agreed to pay the Adviser a minimum fee, as described below under "Fund Management – Adviser." The Adviser is sub-licensing rights to the Index to the Fund at no charge.

The Index is the exclusive property of the Index Provider. INQQ The India Internet & Ecommerce Index<sup>TM</sup> is a service mark of the Index Provider and has been licensed for use for certain purposes by the Adviser. Shares of the Fund referred to herein are not sponsored, endorsed, or promoted by the Index Provider, and the Index Provider bears no liability with respect to any such shares. No purchaser, seller or holder of this product, or any other person or entity, should use or refer to any Index Provider trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting the Index Provider to determine whether the Index Provider's permission is required. Under no circumstances may any person or entity claim any affiliation with the Index Provider without the prior written permission of the Index Provider.

The Index is calculated by the Index Administrator. The Index Administrator is not affiliated with the Trust, the Adviser, the Index Provider, the Fund's administrator, custodian, transfer agent or distributor, or any of their respective affiliates.

The Index was created on March 11, 2022. The Index is rebalanced and additions are made semi-annually in June and December. Deletions from the Index may be made at any time due to changes in business, mergers, acquisitions, bankruptcies, suspensions, de-listings and spin-offs, or for other reasons as determined at the sole discretion of the Index Provider. The Adviser and its affiliates were not involved in the creation of the Index and do not provide input to the Index Provider concerning the Index's construction or its eligibility criteria.

*The following disclosure is included to comply with Indian law:*

The information contained herein is not in the form of a prospectus or a statement in lieu of prospectus as per the provisions of the (Indian) Companies Act, 1956 or the (Indian) Companies Act, 2013 and has not been or will not be registered as a prospectus or a statement in lieu of prospectus. The information set out herein does not constitute, and may not be used for or in connection with, an offer or solicitation to do business or purchase any securities or ownership interests by any person in India or in any other jurisdiction in which such offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation. Investments in the Fund may be accepted from or held by a person who is (a) a non-resident Indian, or (b) an overseas citizen of India, or (c) a resident Indian, directly or indirectly, subject to the limits prescribed under the FPI Regulations or the Operational Guidelines for FPIs issued by the SEBI from time to time. The term “non-resident Indian” shall have the same meaning as assigned to such terms under the Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 (“Non-Debt Rules”) made under the Foreign Exchange Management Act, 1999 (“FEMA”), which currently provides that non-resident Indian means an individual resident outside India who is a citizen of India. The term “overseas citizen of India” shall have the same meaning as assigned to such terms under the Non-Debt Rules made under the FEMA, which currently provides that overseas citizen of India means an individual resident outside India who is registered as an Overseas Citizen of India Cardholder under Section 7A of the Citizenship Act, 1955. The term ‘resident Indian’ has the same meaning as assigned to the term “person resident in India” under the FEMA. Please note that under the category of ‘person resident in India’, the Operational Guidelines allow only ‘resident Indian individuals’ to invest in the Fund, subject to fulfillment of certain prescribed conditions. Persons listed in (a) to (c) above shall not be in control of the Fund. Further, if the Fund is controlled by an investment manager or investment advisor, which in turn is controlled and/or owned by any of the persons listed in (a) to (c), then such an investment manager or investment advisor, inter alia, should be appropriately regulated in its home jurisdiction and registered with SEBI as a non-investing FPI.

#### **Additional Principal Investment Strategies Information**

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the securities of Internet Companies. This investment policy may be changed without shareholder approval upon 60 days’ notice to shareholders.

The Fund, using an “indexing” investment approach, seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the Index. The Fund generally will use a replication methodology, meaning it will invest in all of the securities composing the Index in proportion to the weightings in the Index. However, the Fund may also use a representative sampling methodology under various circumstances, including when it may not be possible or practicable to purchase all of the securities in the Index. Representative sampling is an indexing strategy that involves investing in a representative sample of the Index’s component securities that collectively has an investment profile similar to the Index. A number of factors may affect the Fund’s ability to achieve a high correlation with the Index, including Fund expenses, rounding of share prices, the timing or magnitude of changes to the composition of the Index, regulatory policies, and portfolio turnover. There can be no guarantee that the Fund will achieve a high degree of correlation.

The Adviser may sell securities that are represented in the Index or purchase securities not yet represented in the Index, in anticipation of their removal from or addition to the Index. There also may be instances in which the Adviser may choose to overweight securities in the Index, purchase or sell securities not in the Index that the Adviser believes are appropriate to substitute for certain securities in the Index, or utilize various combinations of other available investment techniques in seeking to track the Index. The Fund will not take defensive positions.

The Fund may change its investment objective and index without shareholder approval.

#### **Additional Principal Risk Information**

The following section provides additional information regarding the principal risks of the Fund.

*Cash Transactions Risk.* Unlike most other ETFs, the Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. Paying redemption proceeds in cash rather than through in-kind delivery of portfolio securities may require the Fund to dispose of or sell portfolio securities or other assets at an inopportune time to obtain the cash needed to meet redemption orders. This may cause the Fund to sell a security and recognize a capital gain or loss that might not have been incurred if it had made a redemption in-kind. As a result, the Fund may pay out higher or lower annual capital gains distributions than ETFs that redeem in-kind. The use of cash creations and redemptions may also cause the Fund’s shares to trade in the market at greater bid-ask spreads or greater premiums or discounts to the Fund’s NAV. As a practical matter, only institutions and large investors, such as market makers or other large broker dealers, create or redeem shares directly through the Fund. Most investors will buy and sell shares of the Fund on an exchange through a broker-dealer. Furthermore, the Fund may not be able to execute cash transactions for creation and redemption purposes at the same price used to determine the Fund’s NAV. To the extent that the maximum additional charge for creation or redemption transactions is insufficient to cover the execution shortfall, the Fund’s performance could be negatively impacted.

*Common Stock Risk.* Common stock holds the lowest priority in the capital structure of a company, and, therefore, takes the largest share of the company's risk and its accompanying volatility. Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, generally have inferior rights to receive payments from the issuer in comparison with the rights of creditors or holders of debt obligations or preferred stocks. Further, unlike debt securities, which typically have a stated principal amount payable at maturity (whose value, however, is subject to market fluctuations prior thereto), or preferred stocks, which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock. Also, prices of common stocks are susceptible to general stock market fluctuations and economic conditions, and to volatile increases and decreases in value as market confidence and perceptions change. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic or banking crises.

*Currency Exchange Rate Risk.* Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investments and the value of your shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include: national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning, and you may lose money.

*Depository Receipt Risk.* ADRs, ADSs, GDRs and IDRs are subject to the risks associated with investing directly in foreign securities. ADRs are dollar-denominated depository receipts typically issued by an American bank or trust company that evidence an ownership interest in a security or pool of securities issued by a foreign corporation. ADRs are listed and traded in the United States and designed for use in the U.S. securities markets. ADSs are U.S. dollar-denominated equity shares of a foreign-based company available for purchase on an American stock exchange. ADSs are issued by depository banks in the United States under an agreement with the foreign issuer, and the entire issuance is called an ADR and the individual shares are referred to as ADSs. GDRs and IDRs are similar to ADRs, but are shares of foreign-based corporations generally issued by international banks in one or more markets around the world. GDRs and IDRs are tradable both in the United States and in Europe and are designed for use throughout the world. ADRs, GDRs and IDRs are subject to the risks associated with investing directly in foreign securities, which are described below. In addition, investments in ADRs, GDRs and IDRs may be less liquid than the underlying shares in their primary trading market and GDRs and IDRs, many of which are issued by companies in emerging markets, may be more volatile.

*Early Close/Trading Halt Risk.* An exchange or market may close early or issue trading halts on specific securities or financial instruments. The ability to trade certain securities or financial instruments may be restricted, which may disrupt the Fund's creation and redemption process, potentially affect the price at which the Fund's shares trade in the secondary market, and/or result in the Fund being unable to trade certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

*Emerging Markets Securities Risk.* Emerging markets are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets and more governmental limitations on foreign investment than more developed markets. In addition, securities in emerging markets may be subject to greater price fluctuations than securities in more developed markets. Investments in debt securities of foreign governments present special risks, including the fact that issuers may be unable or unwilling to repay principal and/or interest when due in accordance with the terms of such debt, or may be unable to make such repayments when due in the currency required under the terms of the debt. Political, economic and social events also may have a greater impact on the price of debt securities issued by foreign governments than on the price of U.S. securities. In addition, brokerage and other transaction costs on foreign securities exchanges are often higher than in the United States and there is generally less government supervision and regulation of exchanges, brokers and issuers in foreign countries. Differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards could impede the Adviser's ability to evaluate local companies and impact the Fund's performance. Investments in securities of issuers in emerging markets may also be exposed to risks related to a lack of liquidity, greater potential for market manipulation, issuers' limited reliable access to capital, and foreign investment structures. Additionally, the Fund may have limited rights and remedies available to it to pursue claims against issuers in emerging markets.

Specifically with respect to index funds, the conditions in emerging markets may lead to potential errors in index data, index computation, and/or index construction if information on non-U.S. companies is unreliable or outdated, or if less information about the non-U.S. companies is publicly available due to differences in regulatory, accounting, auditing and financial recordkeeping standards. This, in turn, may limit a fund adviser's ability to oversee the index provider's due diligence process over index data prior to its use in index computation, construction, and/or rebalancing. All of these factors may adversely impact fund performance. In addition, the rights and remedies associated with investments in a fund that tracks an index comprised of foreign securities may be different than a fund that tracks an index of domestic securities.

*Equity Securities Risk.* The prices of equity securities in which the Fund invests may rise and fall daily. These price movements may result from factors affecting individual companies, industries or the securities market as a whole. Individual companies may report better than expected results or be positively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may increase in response. In addition, the equity market tends to move in cycles, which may cause stock prices to rise over short or extended periods of time.

*Foreign Securities Risk.* Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Because foreign exchanges may be open on days when the Fund does not price its shares, the value of the securities held by the Fund may change on days when shareholders will not be able to purchase or sell the Fund's shares. Conversely, shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. These factors can also cause the Fund's shares to trade at a premium or discount to NAV.

*Indian Securities Risk.* Investment in Indian securities involves risks in addition to those associated with investments in securities of issuers in more developed countries, which may adversely affect the value of the Fund's assets. Such heightened risks include, among others, political and legal uncertainty, greater government control over the economy, greater risk of hyperinflation, currency fluctuations and/or currency devaluations or blockage of currency movements or repatriation of capital invested and the risk of nationalization or expropriation of assets. Moreover, in the past, India has experienced civil unrest and hostilities with neighboring countries, including Pakistan, and the Indian government has confronted separatist movements in several Indian states. In addition, religious and border disputes persist in India. Despite measures to ease tensions, that environment remains volatile. Escalation of tensions to conflict, particularly a threat of deployment of nuclear weapons, could destabilize the broader region and materially hinder the development of the Indian economy.

The securities market of India is considered an emerging market that is characterized by a small number of listed companies with significantly smaller market capitalization, greater price volatility, lower trading volumes and substantially less liquidity than more developed markets. These factors, coupled with restrictions on foreign investment and other factors, limit the supply of securities available for investment by the Fund. This will affect the rate at which the Fund is able to invest in the securities of Indian companies, the purchase and sale prices for such securities, and the timing of purchases and sales. Certain restrictions on foreign investment may decrease the liquidity of the portfolio and subject the Fund to higher transaction costs, or inhibit its ability to track the Index.

Brokerage firms in India may be fewer in number, less established than brokerage firms in more developed markets and subject to no or limited regulatory supervision. Since the Fund will need to effect some or all of its securities transactions through these brokerage firms, the Fund is subject to the risk that these brokerage firms will not be able to fulfill their obligations to the Fund (counterparty risk). This risk is magnified to the extent the Fund effects securities transactions through a single brokerage firm or a limited number of brokerage firms. In the event of the insolvency of an Indian brokerage firm, the Fund may lose some or all of the assets held by that brokerage firm as collateral or otherwise.

The Fund may, directly or through such brokerage firm, use a professional central counterparty to enter into securities transactions to reduce its exposure to market counterparties. Such central counterparty may be subject to no or limited regulatory supervision. The Fund may suffer losses in the event of failure by a central counterparty, or other relevant market participants, to complete a transaction. In the event of the insolvency of a central counterparty, the Fund may lose some or all of the assets held by such counterparty as collateral or otherwise.

The Fund may hold its cash and securities with Indian banks and/or Indian depositories, which may be recently established, new to the foreign custody business and subject to no or limited regulatory supervision. The Indian laws and regulatory system may not offer investors protection to the same standard as under similar laws in the U.S. or in the jurisdiction of other developed economies.

Under certain trading conditions, it may be difficult or impossible for the Fund to liquidate its position in an Indian security. This may occur, for example, at times of rapid price movement if the price rises or falls in one trading session to such an extent that under the rules of the relevant exchange trading of the relevant securities is suspended or restricted.

The Indian government has exercised, and continues to exercise, significant influence over many aspects of the Indian economy, and the number of public sector enterprises in India is substantial. Accordingly, Indian government actions in the future could have a significant effect on the Indian economy, which could affect private sector companies and the Fund, market conditions, and prices and yields of securities in the Fund's portfolio. In addition, the economy of India may differ favorably or unfavorably from the U.S. economy in such respects as the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Agriculture occupies a more prominent position in the Indian economy than in the United States, and therefore the Indian economy is more susceptible to adverse changes in weather. Furthermore, monsoons and other natural disasters in India and surrounding regions also can affect the value of the Fund's investments.

Inflation in India remains at very high levels. High inflation may lead to the adoption of corrective measures designed to moderate growth, regulate prices of staples and other commodities and otherwise contain inflation. Such measures could inhibit economic activity in India and adversely affect the Fund's investments. Inflation may also directly affect the investee companies by increasing operating costs and/or reducing the returns from such investments. In addition, high inflation may adversely affect the taxation of Indian investee companies. Uncertainty regarding inflation and currency exchange rates, as well as the possibility that future harmful political actions will be taken by the Indian government and the existence of religious and ethnic unrest, could negatively impact the Indian economy, which likely would adversely affect the performance of the Indian companies in which the Fund invests.

Foreign investment in securities of issuers located or operating in India may be limited or prevented at times due to the limits on foreign ownership imposed by the RBI. In general, if an investment does not result in transfer of ownership and control of the resident Indian company from resident Indian citizens or transfer of ownership or control to persons resident outside India, the aggregate ownership by all the FPIs in an Indian issuer company is limited to the sectoral caps applicable to such Indian company with respect to its paid-up equity capital on a fully diluted basis. The aggregate holding of a single FPI, whether directly or through offshore derivative instruments (“ODIs”) or a combination thereof, in an Indian issuer company must be less than 10% of its total paid-up equity capital on a fully diluted basis. In the case of an ultimate beneficial owner who has direct or indirect common shareholding/beneficial ownership/beneficial interest of more than 50% in an FPI(s) and/or an ODI subscriber entity or if there is common control, the participation through ODIs would be aggregated with the direct holding of FPIs or the other concerned ODI subscribers while determining whether the above investment cap in an Indian company has been triggered. SEBI monitors foreign holdings and periodically announces the applicable foreign ownership limits and changes to such limits. Please note that these restrictions and/controls may at times limit or prevent foreign investment in securities of issuers located or operating in India, may decrease the liquidity of the Fund’s portfolio, and may inhibit the Fund’s ability to track the Index. Further, the Fund may be unable to buy or sell securities or receive full value for such securities.

Additionally, investment in India may be subject to a greater degree of risk associated with governmental approval in connection with the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors. Moreover, there is the risk that if India’s balance of payments declines, the government may impose temporary restrictions on foreign capital remittances. Consequently, the Fund could be adversely affected by delays in, or a refusal to grant, required governmental approval for repatriation of capital. The RBI has expressed concerns on the unprecedented inflow of foreign investments much beyond India’s current account deficits. As a measure for containment, it has indicated that a shift towards a capital controls regime could be considered. There is a potential risk of how such capital control will be affected, for example, by way of a transaction tax, tightening the sector-wise caps for foreign ownership, regulating the instruments by which foreign investments are structured, or otherwise. Any such capital controls regime may inhibit the Fund’s ability to track the Index and may adversely affect the Fund’s investments. Furthermore, investments in India may require the Fund to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to the Fund.

The Fund’s performance may depend on issues other than those that affect U.S. companies and may be adversely affected by different rights and remedies associated with emerging market investments, or the lack thereof, compared to those associated with U.S. companies. Securities laws in India are relatively new and unsettled and, consequently, there is a risk of rapid and unpredictable change in laws regarding foreign investment, securities regulation, title to securities and shareholder rights. Accordingly, new or amended laws and regulations may adversely affect foreign investors. The laws relating to limited liability of corporate shareholders, fiduciary duties of officers and directors and the bankruptcy of state enterprises generally are less developed than or different from such laws in the U.S. In addition, it may be difficult to obtain and enforce a judgment in a court in India, including in a case where there is a default with respect to the security of an Indian issuer or with respect to any other claim that the Fund may have against an issuer or its directors and officers. Even if the Fund initiates a suit against the issuer in a U.S. court, it may not be possible for the Fund to effect service of process in India. Furthermore, if the Fund obtains a judgment in a U.S. court, it may be difficult to enforce such judgment in India. In addition, a party seeking to enforce a foreign judgment in India also is required to obtain approval from the RBI to execute such judgment to repatriate any amount recovered outside of India.

There is less governmental regulation of the securities industry in India than in the U.S. Indian issuers are subject to less regulation and scrutiny with regard to financial reporting, accounting, auditing, and financial recordkeeping than U.S. companies. Therefore, information regarding Indian corporations may be less reliable and all material information may not be available to the Fund or the Index Provider, which could cause errors in the implementation of the Fund's investment strategy and in index data, computation, and construction. For these reasons, the Index Provider's due diligence and oversight process with respect to index data, computation, construction and rebalancing may be limited, all of which may have an adverse impact on the Fund.

Settlement of securities transactions in India is subject to risk of loss, may be delayed and generally is less efficient than in the U.S. In addition, disruptions due to work stoppages and trading improprieties in these securities markets have caused such markets to close. If extended closings were to occur in the Indian market, the Fund's ability to redeem its shares likewise could become impaired. Each of these events could have a negative impact on the liquidity and value of the Fund's investments. To mitigate these risks, the Fund may maintain a higher cash position than it otherwise would, or the Fund may have to sell more liquid securities that it would not otherwise choose to sell, possibly diluting its return and inhibiting the Fund's ability to track the Index.

The stock markets in the region are undergoing a period of growth and change, which may result in trading or price volatility and difficulties in the settlement and recording of transactions, and in interpreting and applying the relevant laws and regulations. The securities industries in India are underdeveloped comparatively, and stockbrokers and other intermediaries may not perform as well as their counterparts in the U.S. and other more developed securities markets. In some cases, physical delivery of securities in small lots has been required in India, and a shortage of vault capacity and trained personnel has existed among qualified custodial Indian banks. These and other factors could have a negative impact on the Fund's performance.

*Illiquid Investments Risk.* In certain circumstances, it may be difficult for the Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for the Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Adviser to dispose of such securities at a fair price.

*Index Tracking Risk.* Tracking error refers to the risk that the Adviser may not be able to cause the Fund's performance to match or correlate to that of the Index, either on a daily or aggregate basis. There are a number of factors that may contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of the Index, rounding of share prices, the timing or magnitude of changes to the composition of the Index, regulatory policies, and high portfolio turnover rate. The Fund incurs operating expenses not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index. Tracking error may cause the Fund's performance to be less than expected. In addition, when a security in the Index reaches its limitation on foreign ownership, it may be removed from the Index and/or the Fund may be forced to sell securities at inopportune times or for prices other than at current market values or may elect not to sell such securities on the day that they are removed from the Index due to market conditions or otherwise. Due to these factors, the variation between the Fund's return and the return of the Index may increase.

*Industry Concentration Risk.* Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. To the extent the Fund concentrates in the securities of issuers in a particular industry, the Fund may face more risks than if it were diversified more broadly over numerous industries. Such industry-based risks, any of which may adversely affect the Fund may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, an industry may be out of favor and underperform other industries or the market as a whole. As of March 11, 2022, the Index was not concentrated in any industry.

*Internet Companies Risk.* Internet Companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, cyclical market patterns, evolving industry standards, frequent new product introductions and the considerable risk of owning small capitalization companies that have recently begun operations. Competitive pressures, such as technological developments, fixed-rate pricing and the ability to attract and retain skilled employees, can significantly affect the Internet software and services sector. Changing domestic and international demand, research and development costs, availability and price of components also can affect profitability of companies in this sector.

*Issuer-Specific Risk.* Changes in the financial condition of an issuer, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of the Fund.

*Large-Capitalization Risk.* Investments in large capitalization companies may go in and out of favor based on market and economic conditions and may underperform other market segments. Some large capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes, and may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion. As such, returns on investments in stocks of large capitalization companies could trail the returns on investments in stocks of small and mid-capitalization companies.

*Limited Authorized Participants, Market Makers and Liquidity Providers Risk.* Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of financial institutions that may act as Authorized Participants. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. Particularly in times of market stress, Authorized Participants, market makers, or liquidity providers may exit the business, reduce their business activities, or otherwise become unable to process creation and/or redemption orders, and there is a possibility that no other entities will step forward to perform these services. This may result in a significantly diminished trading market for the Fund's shares, differences between the market price of the Fund's shares and the underlying value of those shares, and delisting of the shares.

*Market Risk.* An investment in the Fund involves risks similar to those of investing in any fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices. Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the market generally and on specific securities. For example, since December 2019, a novel strain of coronavirus has spread globally, which has resulted in the temporary closure of many corporate offices, retail stores, manufacturing facilities and factories, and other businesses across the world. As the extent of the impact on global markets from the coronavirus pandemic is difficult to predict, the extent to which the pandemic may negatively affect the Fund's performance or the duration of any potential business disruption is uncertain. Any potential impact on performance will depend to a large extent on future developments and new information that may emerge regarding the duration and severity of the pandemic and the actions taken by authorities and other entities to contain the pandemic or treat its impact. The values of the securities in which the Fund invests could decline generally or could underperform other investments. Different types of securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments.

*New/Smaller Fund Risk.* A new or smaller fund's performance may not represent how the fund is expected to or may perform in the long term if and when it becomes larger and has fully implemented its investment strategies. Investment positions may have a disproportionate impact (negative or positive) on performance in new and smaller funds. New and smaller funds may also require a period of time before they are fully invested in securities that meet their investment objectives and policies and achieve a representative portfolio composition. Fund performance may be lower or higher during this "ramp-up" period, and may also be more volatile, than would be the case after the fund is fully invested. Similarly, a new or smaller fund's investment strategy may require a longer period of time to show returns that are representative of the strategy. New funds have limited performance histories for investors to evaluate and new and smaller funds may not attract sufficient assets to achieve investment and trading efficiencies. If a new or smaller fund were to fail to successfully implement its investment strategies or achieve its investment objective, performance may be negatively impacted. Further, when a fund's size is small, the fund may experience low trading volumes and wide bid/ask spreads. In addition, a fund may face the risk of being delisted if the fund does not meet certain conditions of the listing exchange. If a fund were to be required to delist from the listing exchange, the value of the fund may rapidly decline and performance may be negatively impacted. There can be no assurance that the Fund will achieve an economically viable size. Any of the foregoing may result in the Fund being liquidated. The Fund may be liquidated by the Board without a shareholder vote. In a liquidation, shareholders of the Fund will receive an amount equal to the Fund's NAV, after deducting the costs of liquidation, including the transaction costs of disposing of the Fund's portfolio investments. Receipt of a liquidation distribution may have negative tax consequences for shareholders. Additionally, during the Fund's liquidation all or a portion of the Fund's portfolio may be invested in a manner not consistent with its investment objective and investment policies.

*Non-Diversification Risk.* As a non-diversified investment company under the 1940 Act, the Fund may hold a smaller number of portfolio securities than many other funds and may be more sensitive to any single economic, business, political or regulatory occurrence than a diversified fund. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers. The value of the Fund's shares may be more volatile than the values of shares of more diversified funds.

*Operational Risk.* Your ability to transact in shares of the Fund or the valuation of your investment may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third party service providers or trading counterparties. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

*Passive Investment Risk.* The Fund is not actively managed. Therefore, unless a specific security is removed from the Index, or selling that security is otherwise required upon a rebalancing of the Index as addressed in the Index's methodology, the Fund generally would not sell a security because the security's issuer was in financial trouble. If a specific security is removed from the Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. An investment in the Fund involves risks similar to those of investing in any equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. It is anticipated that the value of the Fund's shares will decline, more or less, in correspondence with any decline in value of the Index. The Index may not contain the appropriate mix of securities for any particular point in the business cycle of the overall economy, particular economic sectors, or narrow industries within which the commercial activities of the companies comprising the portfolio securities holdings of the Fund are conducted, and the timing of movements from one type of security to another in seeking to replicate the Index could have a negative effect on the Fund. Unlike other funds that select investments based on analyses of financial or other information relating to companies, the economy or markets, the Fund, like other sector-focused or other narrowly-focused index funds, invests in companies included in the Index in accordance with its investment objective of tracking the performance of the Index. There can be no assurance that an investment in such companies would not underperform the broader market or investments with a different focus. The Fund should not be considered a complete investment program. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of mutual funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

*Sector Focus Risk.* The Fund may invest a significant portion of its assets in one or more sectors and thus will be more susceptible to the risks affecting those sectors. While the Fund's sector exposure is expected to vary over time based on the composition of the Index, the Fund anticipates that it may be subject to some or all of the risks described below. The list below is not a comprehensive list of the sectors to which the Fund may have exposure over time and should not be relied on as such.

*Information Technology Sector Risk.* The Fund is subject to the risk that market or economic factors impacting technology companies and companies that rely heavily on technology advances could have a major effect on the value of the Fund's investments. The value of stocks of technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, the loss of patent, copyright and trademark protections, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, companies in the technology sector may face dramatic and often unpredictable changes in growth rates and competition for the services of qualified personnel.

*Small- and Mid-Capitalization Risk.* The small- and mid-capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. Securities of small- and mid-capitalization companies generally trade in lower volumes, are often more vulnerable to market volatility, and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small- and mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies. Also, there is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Smaller-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

*Trading Risk.* Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Secondary market trading in the Fund's shares may be halted by the Exchange because of market conditions or for other reasons. In addition, trading in the Fund's shares is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules. There can be no assurance that the requirements necessary to maintain the listing of the Fund's shares will continue to be met or will remain unchanged.

Shares of the Fund may trade at, above or below their most recent NAV. The per share NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings since the prior most recent calculation. The market prices of the Fund's shares will fluctuate continuously throughout trading hours based on market supply and demand. The trading prices of the Fund's shares may deviate significantly from the value of the Fund's underlying portfolio holdings, particularly in times of market stress, with the result that investors may pay more or receive less than the underlying value of the Fund shares bought or sold. This can be reflected as a spread between the bid and ask prices for the Fund's shares quoted during the day or a premium or discount in the closing price from the Fund's NAV. In stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. These factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV. However, given that shares of the Fund can be created and redeemed only in Creation Units at NAV (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAVs), the Adviser does not believe that large discounts or premiums to NAV will exist for extended periods of time. While the creation/redemption feature is designed to make it likely that the Fund's shares normally will trade close to the Fund's NAV, exchange prices are not expected to correlate exactly with the Fund's NAV due to timing reasons as well as market supply and demand factors. In addition, disruptions to creations and redemptions or the existence of extreme volatility may result in trading prices that differ significantly from NAV.

As with all ETFs, the Fund's shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Fund's shares will approximate the Fund's NAV, there may be times when the market price of shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for shares in the secondary market, in which case such premiums or discounts may be significant. If a shareholder purchases at a time when the market price of the Fund is at a premium to its NAV or sells at time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Investors buying or selling shares of the Fund in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares of the Fund (the "bid" price) and the price at which an investor is willing to sell shares of the Fund (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares of the Fund based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares of the Fund, including bid/ask spreads, frequent trading of such shares may significantly reduce investment results and an investment in the Fund's shares may not be advisable for investors who anticipate regularly making small investments.

### **Portfolio Holdings**

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information (the "SAI").

### **Fund Management**

#### **Adviser**

Exchange Traded Concepts, LLC, an Oklahoma limited liability company, is located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, its primary place of business, and 295 Madison Avenue, New York, New York 10017. The Adviser was formed in 2009 and provides investment advisory services to other exchange-traded funds.

Under an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser provides investment advisory services to the Fund. The Adviser is responsible for the day-to-day management of the Fund, including, among other things, implementing changes to the Fund's portfolio in connection with any rebalancing or reconstitution of the Index, trading portfolio securities on behalf of the Fund, and selecting broker-dealers to execute purchase and sale transactions, subject to the supervision of the Board. The Adviser also arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. The Adviser administers the Fund's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and provides its officers and employees to serve as officers or Trustees of the Trust.

For the services it provides to the Fund, the Fund pays the Adviser a fee calculated daily and paid monthly at an annual rate of 0.86% of the average daily net assets of the Fund.

Under the investment advisory agreement, the Adviser has agreed to pay all expenses incurred by the Fund except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act ("Excluded Expenses"). The Adviser has entered into an arrangement with the Index Provider pursuant to which the Adviser is permitted to use the Index. As part of the arrangement between the Index Provider and the Adviser, the Index Provider has agreed to assume the obligation of the Adviser to pay all expenses of the Fund (except Excluded Expenses) and, to the extent applicable, to pay the Adviser a minimum fee under the arrangement.

Pursuant to an SEC exemptive order and subject to the conditions of that order, the Adviser may, with Board approval but without shareholder approval, hire a sub-adviser, materially amend the terms of an agreement with a sub-adviser (including an increase in its fee), or continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services. Shareholders will be notified of any such changes.

A discussion regarding the basis for the Board's approval of the investment advisory agreement with the Adviser will be available in the Fund's first Annual Report to shareholders for the fiscal period ending August 31, 2022.

## **Portfolio Managers**

Andrew Serowik, Todd Alberico, and Gabriel Tan are primarily responsible for the day-to-day management of the Fund.

Andrew Serowik joined the Adviser from Goldman Sachs in May 2018. He began his career at Spear, Leeds & Kellogg (“SLK”), continuing with Goldman after its acquisition of SLK in September 2000. During his career of more than 18 years at the combined companies, he held various roles, including managing the global Quant ETF Strats team and One Delta ETF Strats. He designed and developed systems for portfolio risk calculation, algorithmic ETF trading, and execution monitoring, with experience across all asset classes. He graduated from the University of Michigan with a Bachelor of Business Administration degree in finance.

Todd Alberico joined the Adviser in November 2020, having spent the past 14 years in ETF trading at Goldman Sachs, Cantor Fitzgerald, and, most recently, Virtu Financial. He spent most of that time focused on the Trading and Portfolio Risk Management of ETFs exposed to international and domestic equity. He has worked on several different strategies including lead market-making and electronic trading, to customer facing institutional business developing models for block trading as well as transitional trades. Mr. Alberico graduated from St. John’s University in NY with a Bachelor of Science degree in Finance.

Gabriel Tan joined the Adviser in May 2019 as an Associate Portfolio Manager and was promoted to Portfolio Manager in December 2020. He began his career at UBS and BBR Partners where he worked as a financial planning analyst and a portfolio strategist for over four years. During his time there, he developed comprehensive wealth management solutions focused on portfolio optimization, trust and estate planning, and tax planning.

The SAI provides additional information about the portfolio managers’ compensation, other accounts managed, and ownership of Fund shares.

## **Buying and Selling Fund Shares**

### **General**

Shares of the Fund are listed for trading on the Exchange. When you buy or sell the Fund’s shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares of the Fund will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of such shares. A business day with respect to the Fund is any day on which the Exchange is open for business. The Exchange is generally open Monday through Friday and is closed on weekends and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Juneteenth, Thanksgiving Day and Christmas Day.

NAV per share of the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern Time).

When determining NAV, the value of the Fund's portfolio securities is based on market prices of the securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. If a security's market price is not readily available or does not otherwise accurately reflect the fair value of the security, the security will be valued by another method that the Trust's Fair Value Committee believes will better reflect fair value in accordance with the Trust's valuation policies and procedures, which were approved by the Board. Fair value pricing may be used in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Index. This may result in a difference between the Fund's performance and the performance of the Index.

### **Frequent Purchases and Redemptions of Fund Shares**

The Fund does not impose any restrictions on the frequency of purchases and redemptions of Creation Units; however, the Fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the Board evaluated the risks posed by arbitrage and market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of the Fund's investment strategy, or whether they would cause the Fund to experience increased transaction costs. The Board considered that, unlike traditional mutual funds, shares of the Fund are issued and redeemed only in large quantities of shares known as Creation Units available only from the Fund directly to Authorized Participants, and that most trading in the Fund occurs on the Exchange at prevailing market prices and does not involve the Fund directly. Given this structure, the Board determined that it is unlikely that trading due to arbitrage opportunities or market timing by shareholders would result in negative impact to the Fund or its shareholders. In addition, frequent trading of shares of the Fund by Authorized Participants and arbitrageurs is critical to ensuring that the market price remains at or close to NAV.

### **Distribution and Service Plan**

The Fund has adopted a Distribution and Service Plan in accordance with Rule 12b-1 under the 1940 Act pursuant to which payments of up to 0.25% of the Fund's average daily net assets may be made for the sale and distribution of its shares. No payments pursuant to the Distribution and Service Plan will be made during the twelve (12) month period from the date of this Prospectus. Thereafter, 12b-1 fees may only be imposed after approval by the Board. Because these fees, if imposed, would be paid out of the Fund's assets on an on-going basis, if payments are made in the future, these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

## **Dividends, Distributions and Taxes**

### **Fund Distributions**

The Fund pays out dividends from its net investment income and distributes its net capital gains, if any, to investors at least annually.

### **Dividend Reinvestment Service**

Brokers may make available to their customers who own shares of the Fund the Depository Trust Company book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables.

### **Tax Information**

The following is a summary of some important U.S. federal income tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. This summary does not apply to shares held in an individual retirement account or other tax-qualified plans, which are generally not subject to current tax. Transactions relating to shares held in such accounts may, however, be taxable at some time in the future. More information about taxes is located in the SAI.

**You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.**

### *Tax Status of the Fund*

The Fund intends to elect and to qualify for the special tax treatment afforded to regulated investment companies ("RICs") under the Internal Revenue Code of 1986. If the Fund maintains its qualification as a RIC and meets certain minimum distribution requirements, then the Fund is generally not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, if the Fund fails to qualify as a RIC or to meet minimum distribution requirements it would result (if certain relief provisions were not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (Authorized Participants only).

#### *Tax Status of Distributions*

- The Fund intends to distribute for each year substantially all of its net investment income and net capital gains income.
- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares of the Fund.
- The income dividends you receive from the Fund may be taxed as either ordinary income or “qualified dividend income.” Dividends that are reported by the Fund as qualified dividend income are generally taxable to non-corporate shareholders at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income generally is income derived from dividends paid to the Fund by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. may lead to the Fund’s shares trading at a premium or discount to NAV. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund’s shares. Holding periods may be suspended for these purposes for stock that is hedged.
- Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions from the Fund’s short-term capital gains are generally taxable as ordinary income. Distributions from the Fund’s net capital gain (the excess of the Fund’s net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares of the Fund. For non-corporate shareholders, long-term capital gains are generally taxable at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets).
- Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund’s investment strategies will significantly limit its ability to distribute dividends eligible for the dividends received deduction for corporations.

- In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by the Fund in October, November or December of the previous year payable to shareholders of record in such a month may be taxable to you in the previous year.
- You should note that if you purchase shares of the Fund just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as “buying a dividend” and should be avoided by taxable investors.
- The Fund (or your broker) will inform you of the amount of your ordinary income dividends, qualified dividend income, and net capital gain distributions shortly after the close of each calendar year.

#### *Tax Status of Share Transactions*

Each sale of Fund shares or redemption of Creation Units will generally be a taxable event. Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than twelve months. Any capital gain or loss realized upon a sale of Fund shares held for twelve months or less is generally treated as short-term gain or loss. Any capital loss on the sale of shares of the Fund held for six months or less is treated as long-term capital loss to the extent distributions of long-term capital gain were paid (or treated as paid) with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of Fund shares. The ability to deduct capital losses may be limited.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between (i) the market value of the Creation Units at the time of the exchange plus any cash received in the exchange and (ii) the exchanger’s aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between (i) the exchanger’s basis in the Creation Units and (ii) the aggregate market value of the securities and the amount of cash received. The Internal Revenue Service, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Authorized Participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

### *Foreign Taxes*

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. If more than 50% of the total assets of the Fund consist of foreign securities, the Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. Pursuant to the election, the Fund will treat those taxes as dividends paid to its shareholders. Each such shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders' federal income tax. No deductions for foreign taxes paid by the Fund may be claimed, however, by non-corporate shareholders who do not itemize deductions. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability. The Fund (or your broker) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

If the Fund does not hold sufficient foreign securities to meet the above threshold, then shareholders will not be entitled to claim a credit or further deduction with respect to foreign taxes paid by the Fund. A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by the Fund may be subject to certain limitations imposed by the Code, which may result in a shareholder not receiving a full credit or deduction (if any) for the amount of such taxes. In particular, shareholders must hold their Fund shares (without protection from risk of loss) on the ex-dividend date and for at least 15 additional days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a given dividend. Shareholders who do not itemize on their federal income tax returns may claim a credit (but no deduction) for such foreign taxes. Even if the Fund were eligible to make such an election for a given year, it may determine not to do so. Shareholders that are not subject to U.S. federal income tax, and those who invest in the Fund through tax-advantaged accounts (including those who invest through individual retirement accounts or other tax-advantaged retirement plans), generally will receive no benefit from any tax credit or deduction passed through by the Fund.

### *Net Investment Income Tax*

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (including certain capital gain distributions and capital gains realized on the sale of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

### *Non-U.S. Investors*

If you are a nonresident alien individual or a foreign corporation, trust or estate, (i) the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies but (ii) gains from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Non-U.S. shareholders who fail to provide an applicable Internal Revenue Service form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

### *Backup Withholding*

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she, or it is not subject to such withholding.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws.

**More information about taxes is in the SAI.**

### **Additional Information**

#### **Investments by Other Registered Investment Companies**

For purposes of the 1940 Act, the Fund is treated as a registered investment company. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. The SEC recently adopted Rule 12d1-4 under the 1940 Act, which permits registered investment companies to invest in exchange-traded funds offered by the Trust, including the Fund, beyond the limits of Section 12(d)(1) subject to certain terms and conditions, including that such registered investment companies enter into an agreement with the Trust. However, so long as the Fund intends to invest in securities of other investment companies beyond the limits set forth in Section 12(d)(1)(A), registered investment companies are not permitted to rely on Rule 12d1-4.

#### **Continuous Offering**

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act of 1933 (the “Securities Act”), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund's distributor, breaks them down into individual shares of the Fund, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares of the Fund. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares of the Fund, whether or not participating in the distribution of shares of the Fund, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares of the Fund that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that under Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the Fund's Prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

#### **Premium/Discount Information**

The Fund is new and therefore does not have any information regarding how often its shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) its NAV. This information will be available, however, at [www.inqgetf.com](http://www.inqgetf.com) after the Fund's shares have traded on the Exchange for a full calendar quarter.

#### **Financial Highlights**

No financial highlights information is available for the Fund because it is new and has not commenced operations.

Exchange Traded Concepts Trust  
10900 Hefner Pointe Drive, Suite 400  
Oklahoma City, Oklahoma 73120

#### ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund's investments will be available in the Fund's annual and semi-annual reports to shareholders. In the annual report, when available, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal period.

#### STATEMENT OF ADDITIONAL INFORMATION (SAI)

The SAI provides more detailed information about the Fund. The SAI is incorporated by reference into, and is thus legally a part of, this Prospectus.

#### HOUSEHOLDING

Householding is an option available to certain Fund investors. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Please contact your broker-dealer if you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, or if you are currently enrolled in householding and wish to change your householding status.

#### HOW TO OBTAIN MORE INFORMATION ABOUT THE FUND

To request a free copy of the latest annual or semi-annual report (when available), the SAI, or to request additional information about the Fund or to make other inquiries, please contact us as follows:

Call: 855-888-9892  
Monday through Friday  
8:30 a.m. to 5:00 p.m. (Eastern Time)

Write: Exchange Traded Concepts Trust  
10900 Hefner Pointe Drive, Suite 400  
Oklahoma City, Oklahoma 73120

Visit: [www.inqqetf.com](http://www.inqqetf.com)

The SAI and other information are also available from a financial intermediary (such as a broker-dealer or bank) through which the Fund's shares may be purchased or sold.

#### INFORMATION PROVIDED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION

Reports and other information about the Fund are available on the EDGAR Database at <http://www.sec.gov>, and copies of this information also may be obtained, after paying a duplicating fee, by emailing the SEC at [publicinfo@sec.gov](mailto:publicinfo@sec.gov).
